this book proposes regenerative sanitation as the next era of sanitation management and attempts to provide a foundation for the study of sanitation on the premise that sanitation is a complex and dynamic system that comprises of social ecological technological and resource systems the preconception is that sanitation will deliver maximal benefits to society only when there exists a cyclical integration of the three subsystems to enable appropriate linkages between technological design and the delivery platform so as to achieve optimal and sustained sanitation solutions it also calls for the rethinking of sanitation to change the narrative towards more progressive trajectories such as resource recovery and reuse rather than just amelioration it explores the contributions to food security livelihood support urban regeneration rural development and even local economies a new paradigm theory and ten principles for ensuring practical and effective sanitation solutions and management is presented in addition is a unique conceptual framework applicable to both developed and developing countries and to all stages processes and cycles of delivering sanitation solutions that could critically evaluate analyse and provide credible adequate and appropriate sanitation solutions all of which culminates in a strategic and practical application platform called sanitation 4.0 that advocates for total rejuvenation and comprehensive overhaul with eight key strategic considerations for the implementation regenerative sanitation a new paradigm for sanitation 4.0 is inter and trans disciplinary and encourages collaboration between engineers scientists technologists social scientists and others to provide effective and practical user centred solutions it includes relevant case studies examples exercise and future research recommendations it is written as both a textbook for researchers and students as well as a practitioners guide for policymakers and professionals

the way organizations manage their value chain has changed dramatically over the past decade today organizations take account of economic issues but they also adopt a broader perspective of their purpose including social and environmental issues yet despite its global spread sustainable value chain management remains an uncertain and poorly defined ambition with few absolutes the social and environmental issues that organizations should address easily can be interpreted as including virtually everything current literature on the topic seeks to understand the effects and management of initiatives dealing with diversity human rights safety philanthropy community and environment however the penetration of social and environmental considerations into value chain management is described as desire lacking reality thereby making the idea a patchy success the objective of this research anthology is to investigate different angles of sustainable value chain management

the book's 27 chapters fill holes and explore new fields the chapters are organised in five sections sustainable value chains context drivers and barriers sustainable value chains managing activities sustainable value chains managing networks and collaboration sustainable value chains integrative perspectives and sustainable value chains specific sectorial and industry perspectives
